

Steps for Winterizing your Drip & Micro Irrigation Timer using the Winterizing Plug

Winterizing
Plug

MLA-WHTPLUG

Manufactured in USA

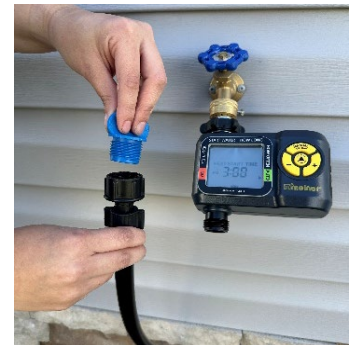

First Turn off the
water Faucet

Unthread the Hose Fitting or
Filter or Pressure Regulator
from Timer

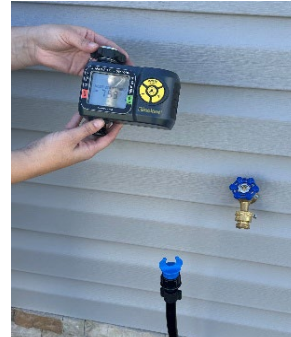

Remove the Winterize Plug by unsnapping from
the side of the 1/2" Poly Tubing or from Package

Thread the Wintering Plug
into the Hose Fitting or Filter
or Pressure Regulator

Unthread the Timer
from the water Faucet

Take the Timer Indoors
where the Temperature
stays above Freezing

Once inside look for
the battery compartment
on the back of the Timer

Remove the battery
compartment from the
back of the Timer

Remove the batteries
and properly dispose

Place on a Shelf , Tool Box or a convenient place
indoors where temperatures remain above Freezing
